Mr. Robert Dent
Anaconda Minerals Company
555 Seventeenth Street
Denver, Colorado 80202

Dear Mr. Dent:

Re: Final Approval, Reclamation/Stabilization Plan, Carr Fork Mine,
ACT/045/004, Tooele County, Utah

The Division has read the letter of June 24, 1986 with Anaconda's response to permit stipulations for the reclamation of the Carr Fork mine site. In general Anaconda's understanding of the stipulations is in line with Division expectations.

As a point of clarification on Stipulation M-10(6)(1) - DC/RS, the Division is concerned that surface flow through the Pine Creek landfill may affect the water quality of Pine Creek. It is the Division's understanding that current reclamation plans call for a french drain to be put in the landfill. Monitoring the water from the drain at the toe of the landfill will provide information on the potential for degradation to Pine Creek. If the french drain is not installed, Anaconda must notify the Division and alternate monitoring methods may be required.

* Regarding the transfer of Anaconda properties to Kennecott Mining Company, Anaconda will remain liable for the reclamation of the properties until the permit has officially been transferred via an Application for Permit Transfer (Form MR-10) (two copies enclosed). In order for the permit transfer to be executed, the transferee must submit a map of lands to be affected by transfer and a sufficient reclamation bond. In order to generate a bond for this property a detailed Mining and Reclamation Plan will need to be submitted.

Thank you for your cooperation during the permitting process.
Please feel free to contact me or Susan Linner if you have further concerns.

Sincerely,

L. P. Braxton
